Global Gateway

Global Gateway

entry points for private investments

Global Gateway is the EU's strategy to mobilise investment at scale in shared priority sectors in partner countries. The EU institutions (DG International Partnerships, DG Enlargement and Eastern Neighbourhood, and DG Middle East, North Africa and the Gulf), Member States and financial partners pool their expertise and resources to support investment projects with real impact, working together as Team Europe.

The private sector drives this ambition. It brings the investment proposals and expertise that turn opportunities into real projects. Global Gateway provides EU private companies a concrete platform to cooperate with Team Europe and supports the preparation and financing of investments, shares investment risks and contributes to the policy objectives of the EU and its partner countries.
